

# Why Use Absolute I&D?

We are in **complete control** of I&D,  
simply stated there are **no extra charges** for supervision

We understand the entire exhibition process and therefore as the Trade Show Manager you are free to handle the myriad amount of other things that happen on the trade show floor. We are in complete control of I&D.

- Our team is experienced, professional and detail oriented meeting challenges in a conscientious, efficient manner.
- Established relationships with trade show facility personnel to ensure on-site coordination of services.
- Knowledge of venue rules and regulations as each venue has a slightly different set of requirements.
- Project management available to order show services including drayage, electrical, telephone, internet, rigging and beverages
- Knowledgeable and efficient I&D company will decrease overtime charges during the tradeshow installation and dismantle periods.
- Absolute I&D labor is trained to install and dismantle trade show booths and exhibit materials, while show management labor may be drawn from a local pool of workers from the building trades organizations with no experience in exhibit building.
- All booth pep work is done properly prior to laying the flooring and assembling an exhibit.
- Be prepared for the unexpected with HDMI and A/V cables, extension cords, power strips, extra velcro and a variety of specialty tapes. Absolute I&D does not leave an exhibit until it is completely done to client satisfaction.
